DSA MINIPROJECT

TITLE : Employee Management System

Team Details :

Sneha   PES2UG22CS563

Sthuthi M.S.   PES2UG22CS585

Sushmitha S   PES2UG22CS607

Data Structure planned to implement :

Structure and Doubly linked list:

A structure is used to define the properties of employee such as their ID, Phone no. , salary, name, department, designation etc. Every new Employee details is added as a linked list node.

Functionalities planned to implement :

1.Create a DLL of n Employees

The user has to enter the number of employees say n

The user has to enter the details such as :

ID, Phone no , salary, name, department and designation

For n such employees.

This creates DLL of n employees

2.Display from beginning

3.Insert at the end

4.Delete at the end

5.Insert at the beginning

6.Delete at the beginning
